

Confortel Atrium Hotel, Madrid, Spain

A 4 star hotel located in a new business district close to the airport of Madrid.

The hotel has been in operation since 2008 and features a distinct avant-garde architectural design. It comprises a total of 195 rooms, of which six are particularly suitable for elderly or disabled guests.

Challenge

- ▮ To create 6 functional and comfortable bathrooms catering to the needs of people with disabilities
- ▮ To implement a solution that would allow the bathrooms to be easily reconfigured to suit the requirements of non-disabled guests as well

Solution

- ▮ Flexible and ergonomic solutions with horizontally and vertically adjustable products, including:
 - Support arms RF548
 - Electrically adjustable wash basin bracket R4270
 - Adjustable shower chair R7551
- ▮ A wall-mounted track system that allows the individual products to be added or removed according to need

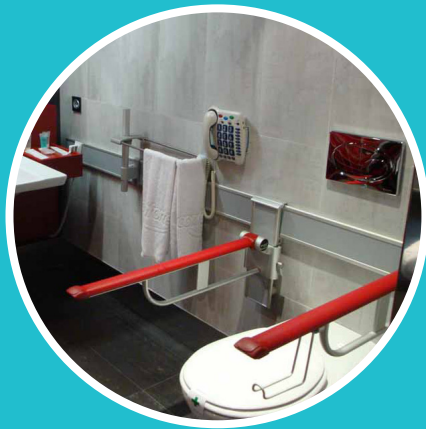

Effect

- ▮ Aesthetic and functional solutions matching the high standard of the Confortel hotel
- ▮ Fully flexible bathrooms that accommodate the needs of disabled as well as non-disabled users
- ▮ Full compliance with national rules and regulations

The challenge

The challenge was to create bathrooms suitable for disabled and elderly but also flexible enough for the hotel to be able to use the same bathrooms for non-disabled guests.

After working together with Aquacontrol, located in Madrid, the architect ultimately chose the full flexibility of the Pressalit Care solution for the project.

Pressalit Care's vertically and horizontally adjustable support arms (RF548) implemented in Confortel bathroom.

The solution

Flexible Pressalit Care bathroom solutions for six bathrooms were implemented to ensure a perfect fit with the avantgarde design features which are represented at the Confortel Atrium hotel.

With electrical wash basin brackets, horizontally and vertically adjustable support arms for toileting as well as horizontally and vertically adjustable shower chairs for the shower section of the bathroom, Confortel is able to offer functionality and comfort to all guests.

Pressalit Care's electrical vertically adjustable wash basin bracket adjustable 300 mm in height (R4270). Here shown with locally customized piece of furniture as well as sink and faucet which are not from Pressalit Care's assortment.

The effect

By implementing a flexible solution on the wall-mounted track, the hotel has the ability to offer accessibility to the bathrooms for all users and thereby live up to national rules and regulations.

At the same time, the hotel has the ability to secure a full occupancy rate on rooms as the individual products can be removed from the track, leaving the bathroom suitable for non-disabled people.

Horisontally and vertically adjustable shower chair (R7551) in shower area.
